- St 04, Sangkat Komboul, Khan Komboul, Phnom Penh

CODING SKILL

- Frontend: HTML, CSS, JavaScript, React.js, firebase
- Backend: Node.js, Laravel
- Database: MySQL, SQL, Server, Mongodb
- Tools & Workflow: GitHub

SOFT SKILL

- Problem solving
- Team collaboration
- Communication skills
- Time management
- Adaptability & fast learner
- Attention to detail
- Critical thinking

LANGUAGES

- Khmer : Native language
- English : Upper-intermediate

REFERENCE

available upon request

PROFILE

I'm a motivated Software Engineering student with experience in web and application development. Good at JavaScript, Node.js, databases, and modern UI frameworks. Eager to apply technical skills to real world projects and continuously improve as a developer.

EDUCATION BACKGROUND

BACHELOR DEGREE OF COMPUTER SCIENCE | SOFTWARE ENGINEERING
Cambodia Academy Digital of Technology (CADT)
Feb 2024 — present

EXPERIENCE

Flutter App Developer – School Project
NisitTrade: University Marketplace

Team Leader | Oct 2025 — now

- Developed a peer-to-peer marketplace mobile app for university students
- Integrated Firebase Realtime Database for live data synchronization
- Designed clean onboarding screens and essential UI components
- Led a team and translated Figma designs into functional app screens

Web Developer – School Project
QuickStock: Inventory Management System

Team Leader | Jun 2025 — Jul 2025

- Built a full stack inventory management system with role-based access (Admin & Supplier)
- Developed RESTful APIs with Node.js, Express, and MySQL
- Designed responsive dashboards using React, Tailwind CSS, and Zustand
- Implemented secure authentication using JWT and bcrypt
- Coordinated tasks and ensured timely delivery within the team

Agile Project Management – School Project

Srum member | Apr 2025 — Jun 2025

- Collaborated using Scrum methodology in a team environment
- Defined user requirements and system requirements
- Worked on SN Mobile app & Cashier management system

Database Design & Analysis – School Project

Team member | Apr 2025 — Jun 2025

- Designed Entity Relationship Diagrams (ERD)
- Performed database normalization and wrote SQL queries using MySQL Workbench

Dear Sir/Madam,

I am writing to apply for the **Web Developer** Internship position. I am very interested in this opportunity because it strongly matches my academic background, technical skills, and long term goal of becoming a professional web developer.

I am currently a software engineering student with hands on experience in web development through school and team projects. I have built responsive web applications using HTML, CSS, JavaScript, React, and Tailwind CSS, developed backend services with Node.js, Express, and MySQL, and implemented features such as authentication, CRUD operations, and role based access control. I also collaborated with team members using Git and GitHub, participated in system planning, and contributed to real project development such as inventory management systems and student marketplace platforms.

Through my studies and projects, I have developed strong problem solving skills, attention to detail, and the ability to learn new technologies quickly. I am motivated, responsible, and eager to gain real world experience while contributing value to your team as a Web Developer Intern.

I sincerely hope you will consider my application. Thank you very much for your time and consideration. I look forward to the opportunity to further discuss my qualifications.

Sincerely,

Hong Layeang
